

1) Téléchargement de XAMPP à l'adresse : <https://sourceforge.net/projects/xampp/files/?source=navbar>

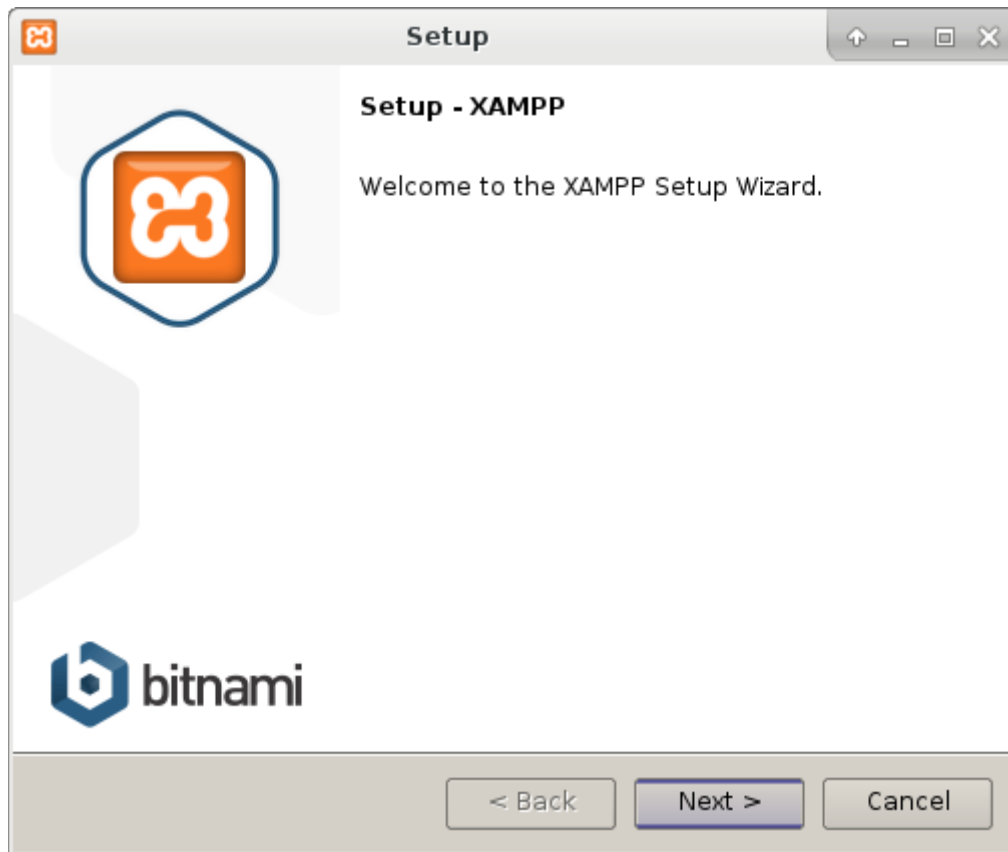

The screenshot shows the SourceForge project page for XAMPP. The page has a dark header with the SourceForge logo and navigation links: Articles, Cloud Storage, Business VoIP, and Internet Speed Test. Below the header, the XAMPP logo is displayed next to the text "XAMPP" and a description: "An easy to install Apache distribution containing MySQL, PHP, and Perl". It also mentions contributors: bitnami, koswalds, and kvogelgesang. A navigation bar includes links for Summary, Files (active), Reviews, Support, Wiki, and Code. A green button labeled "Download Latest Version" is prominent, with the file name "xampp-linux-x64-7.2.1-0-installer.run (139.8 MB)" and a "Get Updates" button. A table lists various XAMPP packages with columns for Name, Modified, Size, and Downloads / Week.

Name	Modified	Size	Downloads / Week
XAMPP Mac OS X	2018-01-19		914
XAMPP Linux	2018-01-19		2,932
XAMPP Windows	2018-01-19		29,119
security	2014-04-09		12
BETAS	2013-06-11		26
XAMPP Solaris	2011-09-20		13
Windows add-ons	2009-08-10		148

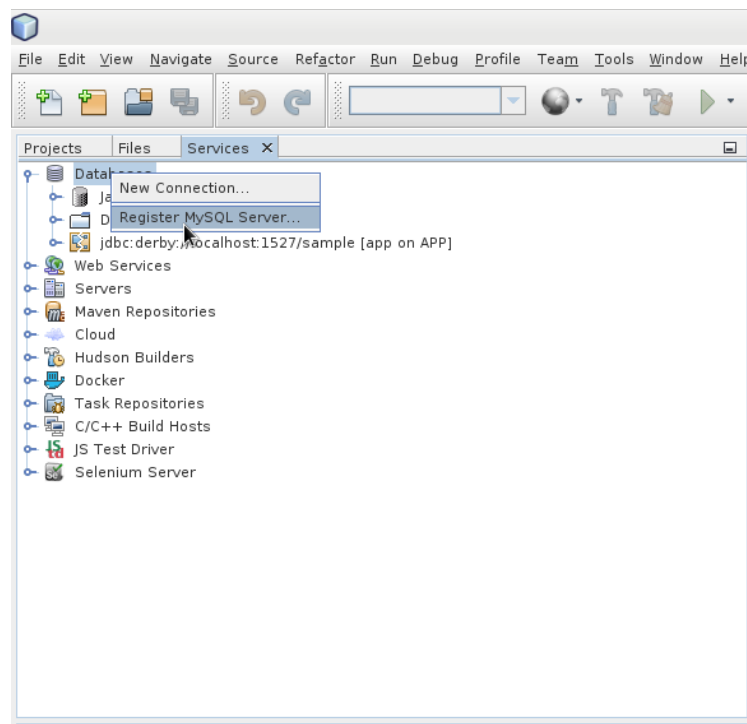

2) Exécution de l'installateur

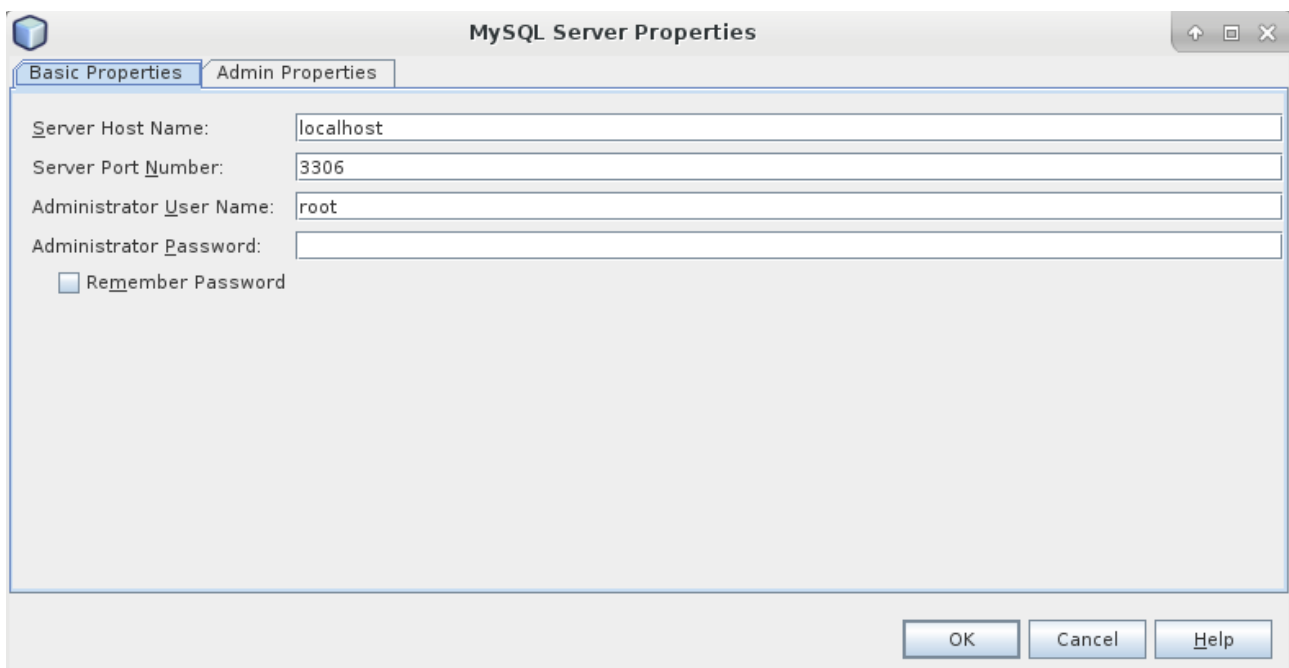

```
[snir2g2@localhost Téléchargements]$ su
Mot de passe :
[root@localhost Téléchargements]# chmod +x xampp-linux-x64-7.2.1-0-installer.run
[root@localhost Téléchargements]# ./xampp-linux-x64-7.2.1-0-installer.run
```

3) Suivre les étapes d'installation

4) Configurer la base de données sous NetBeans

6) Lancer XAMPP

```
[root@localhost lamp]# ./xampp startmysql  
XAMPP: Starting MySQL...ok.
```

7) Se connecter
